EDUCATION

Jaipur Engineering College and Research Center

B.Tech – Information Technology | CGPA: 9.2

Jaipur, Rajasthan

Sep 2023 – Aug 2027

EXPERIENCE

Hewlett Packard Enterprise (HPE)

Project Intern – CTY & Career Preview Program

Remote

Jan 2025 – Present

- Selected among top engineering talent nationwide for HPE's competitive CTY & Career Preview Program focused on enterprise software development.
- Engineered an AI-powered bug triage system using Machine Learning classification models to automatically categorize, prioritize, and route software defects across enterprise systems.
- Designed an automated bug-to-engineer routing pipeline, reducing manual assignment effort and improving resolution efficiency within an Agile/Scrum development workflow.

NeuroSharp Software Pvt. Ltd.

Software Development Trainee

Jaipur, India (On-site)

Jul 2024 – Aug 2024

- Strengthened C++ skills including control flow, pointers, dynamic memory management, file handling, and Object-Oriented Programming (OOP) — encapsulation, inheritance, and polymorphism.
- Implemented core data structures (arrays, linked lists, stacks, queues), analysed time/space complexity, and delivered a C++ OOP mini-project applying real-world design patterns.

PROJECTS

Cash Minimizer | C++ · DSA · Greedy Algorithms

- Engineered a cash settlement system reducing total transactions among N participants by up to 60% using a greedy max-heap algorithm with $O(N \log N)$ time complexity.
- Handled edge cases including zero-sum cycles and floating-point precision, ensuring correctness across all test scenarios.

Secure SSH Remote Server Setup | Linux · SSH · SCP · Rsync · Bash

- Configured a hardened Linux server with SSH key-based authentication; disabled root and password login, managing user access via authorized_keys.
- Automated remote file synchronisation and deployment operations using SCP and Rsync, reducing manual transfer overhead for recurring tasks.

SKILLS

Languages: C, C++, JavaScript, Python, SQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Computer Networks, SDLC

Databases: SQL, PostgreSQL, Relational Database Design

DevOps & Cloud: Linux, Git, GitHub, Docker (Basics), CI/CD Pipelines, REST APIs, Bash, VS Code

Methodologies: Agile, Scrum, Problem Solving, Software Development Life Cycle (SDLC)

Learning: Machine Learning, PyTorch, Generative AI, Agentic AI

CERTIFICATIONS

ServiceNow Certified System Administrator (CSA) – ServiceNow

ACHIEVEMENTS

Solved 450+ Data Structures & Algorithms problems across LeetCode, Codeforces, Codechef.

Achieved a maximum CodeChef rating of 1446 (2*) and Codeforces rating of 1199, placing in competitive programming top tiers.

Shortlisted for TechNova: Igniting Brilliance Hackathon among hundreds of applicants, demonstrating innovation and technical aptitude.
